Summary

Mobile Developer with 2+ years of experience in building Android and cross-platform applications using Flutter. Developed multiple apps with real-time chat, payments, and interactive features. Skilled in writing clean, maintainable code, integrating Firebase and WebSocket, and delivering projects efficiently. Passionate about creating user-friendly, high-performance mobile apps.

Experience

Mobile Developer

Business brothers and partners
10/2025 - Present

Mobile Developer

Ardent soft • Urgench Khorezm
11/2024 - 09/2025

- Developed and maintained mobile applications integrated with CRM systems
  Built a logistics management mobile app for transport companies
  Optimized app performance and code quality, reducing load time and improving stability
  Collaborated with backend team to enhance API communication and data flow
  Released multiple updates improving UX and overall reliability

Project

Joy Top

- A full-featured marketplace where users can sell and rent houses, chat in real-time, and make secure payments.
- Implemented real-time messaging using WebSocket and handled message synchronization between clients.
- Developed modern UI with Flutter and optimized performance for Android and iOS.

4RENT

- Developed a platform where users can post listings, upload photos, and chat with potential buyers.
- Integrated Firebase Cloud Messaging (FCM) for push notifications.
- Used REST API + WebSocket combination for high responsiveness and smooth UX.

Translate app

- Built a multilingual translator app supporting text-to-speech and instant translation.

Virtual tour to Jaloladdin Manguberdi statue app

- This application provides information about the statue of Jalaluddin Manguberdi.
- In the program, you can view a 3D image of the Jaloladding Manguberdi statue and take a virtual tour via Google Maps.

Uzbekistan (Travel to the cities of Uzbekistan) app

- This program provides information about cities, regions, and districts in Uzbekistan.
- You can add information through the admin panel.

Skills

Dart, Java, Kotlin, C++, Flutter, Android, SQLite, Firebase, Web socket, Git, Github, State management(Bloc/Cubit, GetX, Provider), SOLID, Clean architecture(MVP,MVVC,MVVM), REST Api (Dio,Http), Deployment and CI/CD (App Store, Play Store), Localization, Push notifications, Background service, Foreground service
